Overview

ABSTRACT

Globally, unsafe abortion is recognized as a major public health issue. Unsafe abortion is a major problem in developing countries for women in their reproductive years. In the past decade, more than 500,000 women have died from complications of unsafe abortion. In Kenya, as in many other societies research shows that unsafe abortion is a major cause of maternal morbidity and mortality. Each year in Kenya, over 3,000 women die of complications of unsafe abortion and another half a million more suffer short and long term morbidities. Improved access to high-quality comprehensive abortion care, will not only save lives but can reduce costs to health systems and facilities. According to the last study conducted in Kenya the bulk of post-abortion care and services were offered at public secondary and tertiary level health facilities. To effectively develop and deliver programs and interventions that will address existing gaps in the delivery of comprehensive abortion care services and promote more effective legislation on abortion, up-to-date empirical evidence on the magnitude of unsafe abortions and incidence of induced abortions in Kenya is urgently needed. This study was conducted in 2012 among a nationally-representative sample of Levels II to VI public and private health facilities. The Abortion Incidence Complications Methodology (AICM) and the Prospective Morbidity Methodology (PMM) were used as well-established and complementary approaches to estimate abortion incidence and the severity of unsafe abortion complications in Kenya.

UNITS OF ANALYSIS

Health Facility Survey- Health facility

Prospective Morbidity Survey- A Post abortion or Abortion service client

Health Professional Survey- Individual Health Professional (Medical and non-medical)

Scope

NOTES

Health Facility Survey- An nationally representative sample of Public and Private health facilities in Kenya (Level II-Level VI)

Prospective Morbidity Survey- All Post abortion or Abortion service client treated in selected healthcare facilities over a period of 30 days

Health Professional Survey- Individual Health Professional (Medical and non-medical), purposively sampled over all regions in the country

TOPICS

Topic	Vocabulary	URI
Post-abortion Care	PAC	

KEYWORDS

Unsafe Abortions, Induced Abortions, Incidence, Magnitude

Coverage

GEOGRAPHIC COVERAGE

National level

UNIVERSE

Health Facility Survey- Targeted a nationally representative sample of all public and private sector facilities in Kenya

Prospective Morbidity Survey- Targeted recruiting and interviewing all women who sought abortion or post abortion care services in all selected facilities over a period of 30 days of observation

Health Professional Survey- Targeted to interview health professionals (medical and non-medical) in Kenya

Sampling

Sampling Procedure

The Kenya Essential Package for Health (KEPH) defines six levels of preventive and curative public and private health service provision in Kenya (National Coordinating Agency for Population and Development (NCAPD) [Kenya], 2011 #176) which are listed on the Health Management Information System' (HMIS) Master Facility List. The most recent Master Facility List obtained in January 31, 2012 was used to identify the facilities with the potential to provide PAC services from which the nationally representative sample of facilities was selected for the HFS and PMS, giving a sampling frame of 2,838 health facilities. A stratified random sampling approach was used to select the health facilities to be surveyed. The health facilities were stratified by region and level or type of facility. All facilities from level V and VI were included in the sample; because these facilities are most likely to manage and treat high numbers of abortion-related complications in Kenya. Level II-IV facilities' sampling fractions varied as follows depending on the region: Level IV health facilities were sampled at 18% to 36%; Level III health facilities at 8% to 15%; while Level II facilities were represented at 5% to 19%. The total number of facilities selected was 350. Of the 350 sampled health facilities, complete questionnaires were obtained from 328 health facilities for the HFS and 326 facilities for the PMS. Public facilities had a response rate of 99% while the private for-profit and private not-for-profit had a response rate of 92% and 80%, respectively. Of the 6% of the facilities that did not participate, reasons for non-response included an unwillingness by facility officials to participate in the study (5%) and inaccessibility of the facility to interviewers due to political insecurity (1%).

A purposive sample of health professionals was selected with special consideration of geographical representation with respect to their current official place of work.

Response Rate

A total of 328 facilities responded to the Health Facility Survey, representing a Survey response rate of 92.7%.

Weighting

Sampling weights are used for both the health facility survey and the Prospective Morbidity Survey data sets. This was based on the inverse of the probability of a facility being selected from the frame. In both the HFS and PMS data, the weighting variable is named "wt". The HPS data is not weighted since sampling was purposive.

Questionnaires

Overview

Health Facility Survey (HFS) , Prospective Morbidity Survey (PMS) and the Health Professionals' Survey (HPS) tools

The HFS was conducted with a senior health professional knowledgeable about post-abortion care provided at the facility. At large facilities, such as hospitals, the respondent was the chief of the obstetrics and gynecology department, or an obstetrician-gynecologist. At lower level facilities, a nurse, midwife or another health worker in a position to provide information about abortion care in that facility was interviewed. Each respondent completed a face-to-face interview, using a structured questionnaire. Retrospective estimates of the number of in- and out-patient PAC cases treated at that facility in the past month and typical month, or if that was not possible for the respondent to estimate, then a retrospective estimate of the number of in- and out-patient PAC cases treated at that facility in past year and typical year were obtained from HFS respondents. Other information collected included the characteristics of the health facility, facilities' PAC practice and post-abortion counseling. Data collectors for the HFS were trained on the study's methodology and the questionnaire.

The PMS captured data on services received by each woman who came into the health facilities during a 30 day period for post abortion care. Data collected by the PAC providers included patients' demographics, diagnosis on admission, types of treatment received and outcome of the treatment. Data collectors for the PMS were PAC providers at the same sample of health facilities. They were trained in the study methodology and PMS questionnaire. In facilities with a high volume of patients, two PAC providers were trained on the questionnaire. The trained PMS data collectors in low volume facilities were also expected to train colleagues at their facilities to assist in data collection especially when not on duty. Fieldwork was conducted between April and May 2012 for both the HFS and PMS.

The research team, along with input from the project's Advisory Panel, generated a list of key informants who are knowledgeable about the provision of abortion and post-abortion care in different regions of Kenya. Selected respondents included researchers, obstetrician/gynecologists, nurses, midwives, lawyers, clinical officers [mid-level medical providers], politicians, and activists. Topics covered in the questionnaire included respondents' perceptions regarding the type of providers' women seek abortions from in Kenya, the likelihood of women experiencing abortion complications that require treatment according to the type of provider performing the abortion and the likelihood that women who need treatment receive it.

Questionnaires

Health Facility Survey (HFS) , Prospective Morbidity Survey (PMS) and the Health Professionals' Survey (HPS) tools

The HFS was conducted with a senior health professional knowledgeable about post-abortion care provided at the facility. At large facilities, such as hospitals, the respondent was the chief of the obstetrics and gynecology department, or an obstetrician-gynecologist. At lower level facilities, a nurse, midwife or another health worker in a position to provide information about abortion care in that facility was interviewed. Each respondent completed a face-to-face interview, using a structured questionnaire. Retrospective estimates of the number of in- and out-patient PAC cases treated at that facility in the past month and typical month, or if that was not possible for the respondent to estimate, then a retrospective estimate of the number of in- and out-patient PAC cases treated at that facility in past year and typical year were obtained from HFS respondents. Other information collected included the characteristics of the health facility, facilities' PAC practice and post-abortion counseling. Data collectors for the HFS were trained on the study's methodology and the questionnaire.

The PMS captured data on services received by each woman who came into the health facilities during a 30 day period for post abortion care. Data collected by the PAC providers included patients' demographics, diagnosis on admission, types of treatment received and outcome of the treatment. Data collectors for the PMS were PAC providers at the same sample of health facilities. They were trained in the study methodology and PMS questionnaire. In facilities with a high volume of patients, two PAC providers were trained on the questionnaire. The trained PMS data collectors in low volume facilities were also expected to train colleagues at their facilities to assist in data collection especially when not on duty. Fieldwork was conducted between April and May 2012 for both the HFS and PMS.

The research team, along with input from the project's Advisory Panel, generated a list of key informants who are knowledgeable about the provision of abortion and post-abortion care in different regions of Kenya. Selected respondents included researchers, obstetrician/gynecologists, nurses, midwives, lawyers, clinical officers [mid-level medical providers], politicians, and activists. Topics covered in the questionnaire included respondents' perceptions regarding the type of providers' women seek abortions from in Kenya, the likelihood of women experiencing abortion complications that require treatment according to the type of provider performing the abortion and the likelihood that women who need treatment receive it.

Supervision

All research team led by the Principal Investigator, were involved in day-to-day activities of the project. This included training, coordinating field activities and retraining field workers as well as conducting the key informant interviews with senior staff at the ministry of health (Then ministry of medical services and ministry of public health and sanitation). The field teams was further organized into teams all headed by field supervisor. The field supervisor was in charge of ensuring all field data quality measures were implemented by all field data team members including 5% call backs and 100% checks on all questionnaires. They would also ensure a seamless transmission of completed questionnaires to the office for data entry and archiving.

Data Processing

Data Editing

All data forms were checked 100% by the field supervisors and 100% by the office editors. In the office where all questionnaires were submitted for data entry, all questionnaires were received by a designated office data editor, whom, working with the archiving staff logged in all data forms. They were also responsible for a further 100% check of all questionnaires to ensure completeness and accuracy. They also would check the questionnaires vs all field control data sheets to ensure that all data collected in the field was actually submitted to the office for capture. Once this is completed, all data questionnaires were passed to the data entry supervisor who would assign data questionnaires to specific data entry staff.

Data entry screens were developed in CSPro. Extensive controls were implemented to ensure minimal inconsistencies in the final data.

Once all data were entered, there were two more levels of data editing. The database programmer and data manager checked all data, once more for completeness. Outright inconsistencies were also corrected at this stage before data was exported to Stata for further cleaning and eventually analysis.

Other Processing

All data was captured using paper questionnaires. Once these questionnaires were submitted to the office, the data were captured in CSPro and finally exported to Stata for analysis

V572	f203a	203 Outpatient	discrete	numeric	Q203. In this facility, are post-abortion care patients treated as outpatients (they don't spend the night in the facility), inpatients (they spend at least one night in the facility) ?
V573	f203b	203 Inpatient	discrete	numeric	Q203. In this facility, are post-abortion care patients treated as outpatients (they don't spend the night in the facility), inpatients (they spend at least one night in the facility) ?

ID	Name	Label	Type	Format	Question
V574	f204a	204 Typical PAC outpatients code	discrete	numeric	Q204. During a typical month, about how many such post-abortion care patients would you estimate are treated as outpatients at this facility as a whole? Please remember to include all post-abortion care patients whether they are due to spontaneous or induced abortions.
V575	f204b	204 Typical PAC outpatients value	discrete	numeric	Q204. During a typical month, about how many such post-abortion care patients would you estimate are treated as outpatients at this facility as a whole? Please remember to include all post-abortion care patients whether they are due to spontaneous or induced abortions.
V576	f205a	205 Past month PAC outpatients code	discrete	numeric	Q205. In the past month, about how many post-abortion care patients were treated as outpatients in this facility as a whole (please remember to include all post-abortion care patients, whether they are due to spontaneous or induced abortions)
V577	f205b	205 2011 PAC outpatients value	discrete	numeric	Q205. In the past month, about how many post-abortion care patients were treated as outpatients in this facility as a whole (please remember to include all post-abortion care patients, whether they are due to spontaneous or induced abortions)
V578	f206a	206 Typical PAC inpatients code	discrete	numeric	Q206. During a typical month, about how many such post-abortion care patients would you estimate are treated as inpatients at this facility as a whole? Please remember to include all post-abortion care patients whether they are due to spontaneous or induced abortions
V579	f206b	206 Typical PAC inpatients value	discrete	numeric	Q206. During a typical month, about how many such post-abortion care patients would you estimate are treated as inpatients at this facility as a whole? Please remember to include all post-abortion care patients whether they are due to spontaneous or induced abortions
V580	f207a	207 Past month PAC inpatients code	discrete	numeric	Q207. In the past month, about how many post-abortion care patients were treated as inpatients in this facility as a whole? Please remember to include all post-abortion patients, whether they are due to spontaneous or induced abortions
V581	f207b	207 2011 PAC inpatients value	discrete	numeric	Q207. In the past month, about how many post-abortion care patients were treated as inpatients in this facility as a whole? Please remember to include all post-abortion patients, whether they are due to spontaneous or induced abortions

ID	Name	Label	Type	Format	Question
V582	f208a	208 Typical PAC inpatients code	discrete	numeric	Q208. During a typical month, about how many post-abortion care patients would you estimate are referred from this facility as a whole? Please remember to include all post-abortion care patients, whether they are due to spontaneous or induced abortion.
V583	f208b	208 Typical PAC inpatients value	discrete	numeric	Q208. During a typical month, about how many post-abortion care patients would you estimate are referred from this facility as a whole? Please remember to include all post-abortion care patients, whether they are due to spontaneous or induced abortion.
V584	f209a	209 Past month PAC inpatients code	discrete	numeric	Q209. In the past month, about how many post-abortion care patients were referred from this facility as a whole? Please remember to include all post-abortion care patients, whether they are due to complications of spontaneous or induced abortions.
V585	f209b	209 2011 PAC inpatients value	discrete	numeric	Q209. In the past month, about how many post-abortion care patients were referred from this facility as a whole? Please remember to include all post-abortion care patients, whether they are due to complications of spontaneous or induced abortions.
V586	f210a	210 Stop bleeding	discrete	numeric	Q210. When a PAC case comes in and you determine it's too severe for you to handle, what services do you give before you refer them on?
V587	f210b	210 Provide antibiotics	discrete	numeric	Q210. When a PAC case comes in and you determine it's too severe for you to handle, what services do you give before you refer them on?
V588	f210c	210 Provide pain killers	discrete	numeric	Q210. When a PAC case comes in and you determine it's too severe for you to handle, what services do you give before you refer them on?

V1261	v302cod	302 Code	discrete	numeric	Q302. Gestational age from last menstrual period (LMP) in weeks
V1262	v302	302 Gestational age from LMP in weeks:- PLEASE REMOVE 98 & 99 BEFORE COMPUTING S	discrete	numeric	Q302. Gestational age from last menstrual period (LMP) in weeks
V1263	v303	303 History of any attempt to induce or interfere with pregnancy	discrete	numeric	Q303. Did the woman provide a history of interference with the continuation of the pregnancy.
V1264	v304a	304A Who assisted woman to induce-Doctor	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1265	v304b	304B Who assisted woman to induce-Clinical Officer	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1266	v304c	304C Who assisted woman to induce-Nurse	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1267	v304d	304D Who assisted woman to induce-Trained Midwife	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1268	v304e	304E Who assisted woman to induce-TBA/Traditional Healer	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1269	v304f	304F Who assisted woman to induce-Pharmacist/Dispenser	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?

ID	Name	Label	Type	Format	Question
V1270	v304g	304G Who assisted woman to induce-Self-Induced	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1271	v304h	304H Who assisted woman to induce-Relative/Friend	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1272	v304x	304X Who assisted woman to induce-Other	discrete	numeric	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1273	v304xo1	304X Who assisted woman to induce-Other Specify	discrete	character	Q304.Please know that we are not interested in the name of the person but the position/cadre. This could be a doctor, nurse, relative.... Who assisted the woman to induce?
V1274	v305	305 How long for client to realize she needed medical care?	discrete	numeric	Q305. How long did it take for the client to realize that she needed medical care?
V1275	v305o1	305 How long for client to realize she needed medical care?- Other Specify	discrete	character	Q305. How long did it take for the client to realize that she needed medical care?
V1278	v306	306 How long for client to seek healthcare?	discrete	numeric	Q306. After they realized they had a problem, how long did it take for the client to decide to seek healthcare?
V1279	v306o1	306 How long for client to seek healthcare?- Other Specify	discrete	character	Q306. After they realized they had a problem, how long did it take for the client to decide to seek healthcare?
V1282	v307	307 How long for client to reach facility?	discrete	numeric	Q307. After she decided to seek health care, how long did it take to reach the facility?
V1283	v307o1	307 How long for client to reach facility?- Other Specify	discrete	character	Q307. After she decided to seek health care, how long did it take to reach the facility?
V1286	v308	308 Where client sought care first?	discrete	numeric	Q308.Where did the client first seek care when she had the complication?
V1287	v308o1	308 Where client sought care first- Other Specify	discrete	character	Q308.Where did the client first seek care when she had the complication?
V1288	v309	309 Who was first provider to treat client?	discrete	numeric	Q309. Who was the first provider to treat the client when she had the complication?
V1289	v309o1	309 Who was first provider to treat client?- Other Specify	discrete	character	Q309. Who was the first provider to treat the client when she had the complication?
V1290	v310	310 Was client referred from elsewhere?	discrete	numeric	Q310. Was the client referred from elsewhere to this facility?
V1291	v311	311 Did client receive any treatment before referral	discrete	numeric	Q311. Did the client receive any treatment before being referred to this facility?

ID	Name	Label	Type	Format	Question
V1292	v312	312 Duration client took to seek care at this facility	discrete	numeric	Q312. How long did the client take to seek care at this health facility from the time of referral (for those referred) ?
V1293	v312o1	312 Duration client took to seek care at this facility- Other Specify	discrete	character	Q312. How long did the client take to seek care at this health facility from the time of referral (for those referred) ?
V1296	v313	313 Vitals- Body Temperature in degrees Cent.	discrete	numeric	A. Body temperature
V1297	v314	314 Vitals- Pulse Rate Per Minute	discrete	numeric	B. Pulse rate
V1298	v315s	315S Vitals- Blood Pressure- Systolic	discrete	numeric	C. Blood pressure
V1299	v315d	315D Vitals- Blood Pressure- Diastolic	discrete	numeric	C. Blood pressure
V1301	v316	316 Physical Exam- Abdominal tenderness	discrete	numeric	Q316. Abdominal tenderness
V1302	v317	317 Physical Exam- Adnexal tenderness	discrete	numeric	Q317. Adnexal tenderness
V1303	v318	318 Physical Exam- Foreign Body	discrete	numeric	Q318. Any form of foreign body/material in genital tract (vagina, cervix, uterus)
V1304	v319	319 Physical Exam-Vaginal bleeding	discrete	numeric	Q319. Vaginal bleeding
V1305	v320	320 Physical Exam-Foul smell	discrete	numeric	Q320. Offensive or foul smelling vaginal discharge?
V1306	v321a	321A Mechanical Injuries detected- Cervical lacerations	discrete	numeric	Q321. Which of the following mechanical injuries did you detect?
V1307	v321b	321B Mechanical Injuries detected- Cervical tears	discrete	numeric	Q321. Which of the following mechanical injuries did you detect?
V1308	v321c	321C Mechanical Injuries detected- Tenaculum bites on cervix	discrete	numeric	Q321. Which of the following mechanical injuries did you detect?
V1309	v321d	321D Mechanical Injuries detected- Tears on vulva/ vagina	discrete	numeric	Q321. Which of the following mechanical injuries did you detect?
V1310	v321y	321Y Mechanical Injuries detected- None of the above	discrete	numeric	Q321. Which of the following mechanical injuries did you detect?
V1311	v322a	322A Physical or clinical signs of- Pelvic abscess	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1312	v322b	322B Physical or clinical signs of- Local/pelvic peritonitis	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1313	v322c	322C Physical or clinical signs of- Generalized peritonitis	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1314	v322d	322D Physical or clinical signs of- Uterine Perforation	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]

ID	Name	Label	Type	Format	Question
V1315	v322e	322E Physical or clinical signs of- Gangrenous uterus	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1316	v322f	322F Physical or clinical signs of- Gangrenous bowel	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1317	v322g	322G Physical or clinical signs of- Sepsis	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1318	v322h	322H Physical or clinical signs of- Shock	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1319	v322i	322I Physical or clinical signs of- Tetanus	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1320	v322x	322X Physical or clinical signs of- Other	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1321	v322xo1	322X Physical or clinical signs of- Other Spcify	discrete	character	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1322	v322ynon	322Y Physical or clinical signs of- None	discrete	numeric	Q322. Did you elicit/ observe any signs suggestive of any of the following complications [Early physical/ clinical signs suggestive of any of the following complications]
V1323	v323a	323A Physical or clinical signs of- RDS	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1324	v323b	323B Physical or clinical signs of- Renal failure	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1325	v323c	323C Physical or clinical signs of- Liver failure	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications

ID	Name	Label	Type	Format	Question
V1326	v323d	323D Physical or clinical signs of- Cardiac failure	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1327	v323e	323E Physical or clinical signs of- Coma	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1328	v323f	323F Physical or clinical signs of- DIC	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1329	v323x	323X Physical or clinical signs of- Other	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1330	v323xo1	323X Physical or clinical signs of- Other Specify	discrete	character	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1331	v323y	323Y Physical or clinical signs of- No sign of organ/system failure	discrete	numeric	Q323. Which of the following signs of organ/system failure did you find on examination? Late physical/ clinical signs suggestive of any of the following complications
V1332	v324	324 Best clinical estimate of gestation	discrete	numeric	Q324. Best clinical estimate of gestation by trimester
V1333	v401	401 Diagnosis	discrete	numeric	Q401. The diagnosis is:
V1334	v401o1	401 Diagnosis- Other Specify	discrete	character	Q401. The diagnosis is:
V1335	v402	402 Is the abortion also septic	discrete	numeric	Q402. Is the abortion also septic?
V1336	v501	501 Uterine evacuation procedure done?	discrete	numeric	Q501. Was any uterine evacuation procedure performed to treat the client for her presenting problem?
V1337	v502	502 What uterine evacuation procedure was done	discrete	numeric	Q502. Describe the procedure
V1338	v502o1	502 What uterine evacuation procedure was done- Other Specify	discrete	character	Q502. Describe the procedure
V1339	v503	503 Primary performer of procedure	discrete	numeric	Q503. The evacuation procedure was performed primarily by...?
V1340	v503o1	503 Primary performer of procedure- Other Specify	discrete	character	Q503. The evacuation procedure was performed primarily by...?
V1341	v504	504 Where was procedure performed	discrete	numeric	Q504. Where was the evacuation procedure performed?
V1342	v504o1	504 Where was procedure performed- Other Specify	discrete	character	Q504. Where was the evacuation procedure performed?
V1343	v505	505 Pain medication provided during procedure	discrete	numeric	Q505. Was the client provided any pain medication during the evacuation procedure?

ID	Name	Label	Type	Format	Question
V1344	v506a	506A What medication- GA	discrete	numeric	Q506. What did the client receive?
V1345	v506b	506B What medication- LA/PCB	discrete	numeric	Q506. What did the client receive?
V1346	v506c	506C What medication- Sedation	discrete	numeric	Q506. What did the client receive?
V1347	v506d	506D What medication- Analgesics	discrete	numeric	Q506. What did the client receive?
V1348	v506e	506E What medication- Verbocaine	discrete	numeric	Q506. What did the client receive?
V1349	v506x	506X What medication- Other	discrete	numeric	Q506. What did the client receive?
V1350	v506xo1	506X What medication- Other Specify	discrete	character	Q506. What did the client receive?
V1351	v507	507 Client given Antibiotics during current visit	discrete	numeric	Q507. Was the client given antibiotics during her current visit at this facility?
V1352	v508	508 Type of antibiotics given	discrete	numeric	Q507. Type of antibiotics given
V1353	v509	509 Client given IV fluids during current visit	discrete	numeric	Q509. Was the client given intravenous fluids during her current visit at this facility?
V1354	v510	510 Client given blood or blood products during current visit	discrete	numeric	Q510. Was the client given blood or blood products during her current visit at this facility?
V1355	v511	511 Client given oxytocics during current visit	discrete	numeric	Q511. Was the client given oxytocics (oxytocin or ergometrine or misoprostol) after the uterine evacuation procedure?
V1356	v601a	601A Was procedure performed- Hysterectomy	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1357	v601b	601B Was procedure performed- Salpingectomy	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1358	v601c	601C Was procedure performed- Abscess Drainage	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1359	v601d	601D Was procedure performed- Repair of cervical tear	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1360	v601e	601E Was procedure performed- Repair of vaginal tear	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1361	v601f	601F Was procedure performed- Repair of perineal tear	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1362	v601g	601G Was procedure performed- Repair of perforated uterus	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1363	v601h	601H Was procedure performed- Repair of gut perforation	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1364	v601i	601I Was procedure performed- Laparotomy	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?

ID	Name	Label	Type	Format	Question
V1365	v601x	601X Was procedure performed- Other	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1366	v601xo1	601X Was procedure performed- Other Specify	discrete	character	Q601. Were any of the following surgical procedures performed on the client?
V1367	v601y	601Y Was procedure performed- None	discrete	numeric	Q601. Were any of the following surgical procedures performed on the client?
V1368	v701	701 Client counseled on FP on discharge	discrete	numeric	Q701. Was the client counseled on contraception upon discharge?
V1369	v702	702 Client given modern FP on discharge	discrete	numeric	Q702. Was the client given modern contraception on discharge?
V1370	v703a	703A What FP client received- Pills	discrete	numeric	Q703. What did the client receive?
V1371	v703b	703B What FP client received- Injections	discrete	numeric	Q703. What did the client receive?
V1372	v703c	703C What FP client received- Implants	discrete	numeric	Q703. What did the client receive?
V1373	v703d	703D What FP client received- Female Sterilization	discrete	numeric	Q703. What did the client receive?
V1374	v703e	703E What FP client received-IUCD	discrete	numeric	Q703. What did the client receive?
V1375	v703f	703F What FP client received- Male Condoms	discrete	numeric	Q703. What did the client receive?
V1376	v703g	703G What FP client received- Female Condoms	discrete	numeric	Q703. What did the client receive?
V1377	v703h	703H What FP client received- Diaphragm	discrete	numeric	Q703. What did the client receive?
V1378	v703i	703I What FP client received- Foam/Jelly	discrete	numeric	Q703. What did the client receive?
V1379	v703j	703J What FP client received- Patch	discrete	numeric	Q703. What did the client receive?
V1380	v703x	703X What FP client received- Other	discrete	numeric	Q703. What did the client receive?
V1381	v703xo1	703X What FP client received-Other Specify	discrete	character	Q703. What did the client receive?
V1382	v704	704 Was client referred for modern FP	discrete	numeric	Q704. Was the client referred elsewhere for modern contraception?
V1383	v801	801 Outcome of current care was	discrete	numeric	Q801. The outcome of current care was ...?
V1384	v8015o1	801 Outcome- Left against medical advice-Specify	discrete	character	Q801. The outcome of current care was ...?
V1385	v8016o1	801 Outcome-Referral-Specify	discrete	character	Q801. The outcome of current care was ...?
V1386	v802	802 Duration of care	discrete	numeric	Q802. How long did the client stay in the facility for care?
V1389	wt	Weight	contin	numeric
